

## INDEPENDENT AUDITOR'S REPORT

To the board and members of Organization;
To the Executive Director
Of the Centre for Environmental Initiatives "Ecoaction"
Ms. Gozak Natalia

#### **Opinion**

We have audited the financial statements of the Centre for Environmental Initiatives "Ecoaction" (hereinafter – Organization), which comprise the statement of financial position as at December 31, 2021, and and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Organization as at December 31, 2021 and of iits financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

#### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Organization within the meaning of the ethical requirements applicable in Ukraine to our audit of financial statements and have fulfilled our other responsibilities under those requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Material Uncertainty Related to Going Concern**

We draw attention to Note «Special Provisions» in the financial statements, which indicates that according to Decree of the President of Ukraine of February 24, 2022 No. 64/2022 "On martial law in Ukraine "in connection with the military aggression of the Russian Federation against Ukraine on the territory of Ukraine imposed martial law from 05 hours 30 minutes on February 24, 2022.

This situation and subsequent events have a comprehensive impact on all Organizations operating in Ukraine. These events or conditions indicate that a material uncertainty exists that may cast significant doubt on the Organization's ability to continue as a going concern. At present, it is impossible to reliably assess the impact of military aggression on the Organization's future activities.

Our opinion is not modified in respect of this matter.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### Recognition of income and expenses related to the execution of projects

Implementation of non-profit projects, including contracts funded by various donors, is a core activity of the Organization. Auditors believe, the income and expenses associated with the implementation of these projects are the most influential indicators of financial reporting; they give an idea of the Organization's activities for the reporting year. Taking into account the significance of this indicator, the auditors carried out in-depth analysis of the documents that are the basis for recognizing such income and expenses. Documents that verify the balance of payments with donors were also examined, as these documents also confirm the Organization's compliance with its obligations under grant agreements.

Responsibilities of Managementand Those Charged with Governance for the Financial

Statenterats: андр "Марінченко

Management is responsible for preparation and fair presentation of the financial statements in accordance with IFRSs and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Organization's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Organization or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Organization's financial reporting process.

#### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
  error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
  sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion,
  forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
  are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness
  of the Organization's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Organization's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Organization to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is Director of Audit firm Marinchenko and partners, LLC

For the year ended December 31, 2021 (in Euro)

#### **Notes to financial statements**

## 1. Background

NGO "Centre of Environmental Initiatives "Ecoaction" (Ecoaction) is a non-governmental not-for-profit organization founded in 2017 to unite efforts of experts and activists in a joint struggle to protect the environment. We advocate for renewable energy, countering climate change, clean air for all and sustainable development of transport and agriculture in Ukraine. Our mission is to protect the environment via influencing decision makers and stakeholders and to develop an active Ukrainian community. Thus, our activities aim to influence decision makers and encourage them to conduct more environmentally friendly government policy from one hand, and from the other, to develop strong and influential community of civil society actors in Ukraine and the region to make the joint efforts more effective.

Ecoaction is willing to maintain political and economic independence, therefore it doesn't accept money from political parties or business corporations. Currently Ecoaction relies on funding from development programs of European governments and private foundations. However, we aim to get more support through individual donations from Ecoaction supporters.

Ecoaction is working currently on the following topics:

#### Energy

Ecoaction is trying to redirect the energy policy of Ukraine away from intensive coal and nuclear energy development to energy efficient economy and renewable energy sources (RES). Ecoaction is working with politicians and officials advocating for the new approaches to energy sector management. In 2021 Ecoaction focused on continued support for the Platform for Sustainable Development of Coal Towns of Donetsk region (now uniting 9 towns, 3 local NGOs and the regional CCI) around the vision of future just transition from coal to renewables and diversification of their economies; and on the monitoring and advocating for the safe decommissioning of nuclear power stations in Ukraine, as well as communicating the dangers of building new nuclear units.

2021 also saw the continued push for the establishing Ukrainian coal phase-out date. Ecoaction has initiated the development and contributed to two studies: "The economic implications of phasing out coal in Ukraine by 2030" done by Aurora Energy Research with

the support from the Ukrainian office of the Heinrich Boell Foundation; and "Health Impacts of Coal Power Plant Emissions in Ukraine" done by Centre for Research on Energy and Clean Air (CREA). In December 2021 during COP26 Ukrainian government tentatively announced a 2035 coal phase-out date.

In 2021 Ecoaction also continued to work on the national and international levels promoting the energy transition to a sustainable renewable energy system via development of the Coalition of Ukrainian non-governmental organizations and business associations promoting transition to 100% renewable energy. Ecoaction launched an online course about renewables for high-schoolers and their teachers, as well as published a study "Post-feed-in tariff Ukraine. New renewable power support mechanisms". This allowed for a dedicated push advocating introduction of net metering/net billing to the Ukrainian legislation.

#### Climate change

In the sphere of national climate policy, we've pushed for more ambition climate goal for Ukraine in NDC2 for Paris Agreement. In July 2021 government approved updated NDC with real reduction. Ecoaction worked with local authorities to raise national ambition, made 3 position with the expectations of Ecoaction and other CSO's in climate policy. Some recommendations from Roadmap of climate goals from civil society until 2030 were included in Analytical paper for updated NDC. Analytical publication has been published regardingthe price of carbon in Ukraine and the practice of using revenues from the CO2 tax in the work, presentation was for Ukraine and EECCA region.

Ecoaction continue raise awareness about climate change. Prepared thematical newsletters, articles, participation in online events, comments for journalists. 26 September Ecoaction organized a Climate march. Around 1000 participant joined march. Ecoaction delivered 10 demands to the authorities during the march, 3 of which were fulfilled. Before the march, events were held for different audiences: students, activists, urbanists. The march was supported by more than 30 organizations. On September 26, events related to the topic of climate change were also held in 13 settlements.

In 2021 UCN presented the results of the all-Ukrainian poll "Climate change and adaptation to climate change". 6 representatives of 5 organizations of the UCN (NGO Ecoclub, NGO Ecodia, NGO Ekoltava, NGO Plato, NGO Legal Analytics) took part in the COP26. UCN prepared a Position on Climate Policy Priorities in Ukraine on the occasion of the COP26. UCN submitted proposals for the Strategy of Environmental Safety and Adaptation to Climate Change of Ukraine and supported the collective appeal on the importance of

preserving the State Water Agency under the Ministry of Environment. UCN sent out 11 monthly digests.

CAN EECCA has consulted the delegation of Kyrgyzstan before COP, prepared a joint position and delivered it to the decision makers at the conference. The network sent 12 letters to national authorities of CAN EECCA region, requesting reports on climate actions, demanding ambitious NDCs and carbon-neutrality goals by 2050 adoption, 4 answers were received. CAN EECCA secretariat has organised an offline meeting in Kyiv in October which allowed the Board and Secretariat to discuss strategic actions and reflect on our acheivements. 10 people from all sub-regions of EECCA took part. 50 regular digests of news published and disseminated among the audience of more than 1500 people. CAN EECCA organised 5 trainings within Climate Leadership school with more than 70 participants total. A new project - Climate Dialogs with 6 thematic working groups (Renewable energy and energy efficiency, Education and outreach, Ambitious Climate policy, Adaptation and biodiversity, Cities and mobility, Fossil fuels phase out and Just transition) was launched. More than 200 experts from 11 EECCA countries have joined.

We continue to work towards adaptation to climate change. Every month we have a thematic mailing list dedicated to adaptation. Preparing materials. Several studies on sea acidification and climate change risks to water resources in Ukraine been released. Ecoaction was a member of working group to develop the National Adaptation Strategy. Ecoaction coorganized the March for Kyiv, where we defended the demands for the adaptation to the climate change of Kyiv. Together with the members of the Ukrainian Climate Network prepared a Catalog of nature-based solutions. In October, together with the organization Peli can live restored the forest belt in Tomashivska settlement.

During year Ecoaction active worked in transport sector. Ecoaction together with Kharkiv National Automobile and Road University organized a school of sustainable mobility. Together with Ucycle made the Summer School for Urban Planners in Ukraine 2021. Conducted 4 mobility talks on: electric mobility, 9 ideas for a comfortable city, climateneutral cities, cycling strategy. Conducted public discussions on the Strategy for Sustainable and Smart Urban Mobility of the EU Green Deal, with the involvement of other NGOs. Based on the discussions of the strategy, a brochure for sustainable transport development managers was prepared and published. Held a contest for the best city: mobility.

#### Industry and agriculture

environmental impacts in Ukraine.

In 2021 Ecoaction actively monitored and commented national legislation in the sectors of industry, agriculture and environmental control. This allowed our positions to be integrated into the draft of laws on the system of state environmental control in Ukraine and reducing of industrial and agricultural pollution which was submitted and are to be adopted by the government. Finally, Nitrate directive package was completely approved by Ministries of agriculture and environment.

We conducted "In Search of Clean Water" Expedition which is a pilot initiative developed by our team and local activists who have been collecting data on quality of drinking water in their communities. The team's goal was to study the condition and quality of ground and surface water in the rural areas, spread the environmental information that is socially significant, and popularize the practice of public environmental monitoring.

This activity was followed by the first-ever fundraising campaign at Ecoaction to collect funds for procurement of small water test suitcases for further deployment of it to local groups of activists for public monitoring.

Ecoaction continues to support local communities in their claims on defending their rights for safe environment against Myronivsky Hliboproduct (MHP) through the EBRD and IFC complaint mechanisms (complaint submitted in 2018). The moderation process was stopped on the Company's request and transferred to phase of audit as mediation process got stuck. Ecoaction acts as a regional focal point for the Land Matrix Initiative. The Initiative is a collaboration of the civil society and research institutions from around the globe aiming to build comprehensive database of the big land acquisitions and to provide analysis of the phenomenon trends and impacts. Further, organization has been contributing to the discussion on the land ownership in Ukraine with media publications. We published a several comprehensive reports on nature of land concentration and its socio-economic and

In the sector of industrial air pollution, we continued our support of the local activists and NGOs in industrial cities as well as in other regions of Ukraine. We conducted the contest among cities and towns on the best air quality and level of implementing air quality monitoring system there.

We understand that in order to achieve great change the efforts should to be united. Thus, we are members of six international networks: Climate Action Network International and CAN EECCA, CEE Bankwatch Network, Coalition on Human Rights in Development, INFORSE

Europe, Land Matrix, Transport and Environment, – we are the members of 4 national networks: Ukrainian Climate Network, Ukrainian Rural Development Network, Ukrainian Urban Movement, Coalition for Energy Transition.

### Special provisions

According to the Decree of the President of Ukraine of February 24, 2022, No. 64/2022 "On martial law in Ukraine" in connection with the military aggression of the Russian Federation against Ukraine on the territory of Ukraine imposed martial law from 05 hours 30 minutes on February 24, 2022.

The specified situation and subsequent events have a comprehensive impact on all companies whose activities are carried out on the territory of Ukraine. Accordingly, the Organization's management notes that there is a material uncertainty that may cast significant doubt on the Organization's ability to continue as a going concern.

Currently, it is impossible to reliably assess the impact of military aggression on the Organization's future activities. It should be noted that the Organization has no suppliers and buyers who are residents of aggressor countries, business relations do not extend to the territory of these countries.

It should be noted separately that the Management does not intend to cease the Organization's activities, therefore the provisions of IFRS 5 "Non-current assets held for sale and discontinued operations" were not applied during the preparation of financial statements.

#### 2. Basis for preparation of financial statements

Financial statements are prepared in accordance with International Financial Reporting Standards (IFRS).

National currency of Ukraine is hryvnia (UAH). Therefore, the accounting currency for the purposes of given financial statements is hryvnia.

The Organization keeps its records in UAH according to Ukrainian National Accounting Standards (UNAS). Certain adjustments not reflected in the Organization's accounting registers and required to present the Organization's financial position, its operating results and cash flows according to IFRS, make these financial statements different from those prepared under UNAS.

Financial statements are presented in euro (EUR), all amounts are rounded to integer values, if not stated another.

## 3. Key accounting judgments, estimates and assumptions and basic accounting policies

#### Use of estimates

The preparation of the financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements. These estimates are based on information available as at the date of the financial statements. Actual results, therefore, could differ from these estimates. The most significant estimates with regard to these financial statements relate to the valuation of cost and useful lives of property, plant and equipment, intangible assets.

#### Foreign currencies

Based on the economic substance of the underlying events and circumstances, the functional currency of the Organization is Ukrainian hryvnia.

Transactions in foreign currencies are initially recorded in the functional currency at the exchange rates valid at the transaction date. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange valid at the balance sheet date. All resulting differences are reflected in the income statement.

These financial statements are presented in Euro. The Organization maintains its accounting records in Ukrainian hryvnya ("UAH") in accordance with the requirements of Ukrainian statutory accounting and tax legislation. The accompanying financial statements differ from the financial statements issued for statutory purposes in Ukraine in that they reflect certain adjustments, not recorded in the Organization's books, which are appropriate to present the financial position and the results of the Organization's operations in accordance with IAS.

The translation of the financial statements from the hryvnia to the euro is carried out as follows:

- current assets and liabilities are translated at the NBU exchange rate at the date of preparation of the financial statements;
- costs in UAH for projects funded from grants in euros or US dollars are translated into euros or dollars at the exchange rate agreed upon in the grant contract;
- costs in dollars are converted into euro at the exchange cross rate of the NBU;
- other expenses and incomes in UAH are translated into euro at the average annual exchange rate of the NBU;
- balancing amounts are reflected as a reserve for conversion into foreign currency.

Following is a summary of exchange rates published by the NBU for the currencies of the Company's principal activities:

Currency exchange rates according to NBU:

| Official rate by NBU            | Euro      | USD       | CZK      | NOK      |
|---------------------------------|-----------|-----------|----------|----------|
| 31.12.2021                      | 30,922600 | 27,278200 | 1,240100 | 3,100000 |
| 31.12.2020                      | 34,739600 | 28,274600 | 1,323800 | 3,295700 |
| Annual average NBU rate in 2021 | 32,308992 | 27,286189 | 1,258964 | 3,176552 |

## Property, plant and equipment

Property, plant and equipment are valued at acquisition, less accumulated depreciation and accumulated loss from impairment.

Property, plant and equipment are depreciated under the straight-line method over estimated useful lives of corresponding assets:

| Group            | Useful life |  |
|------------------|-------------|--|
| Office equipment | 3-5 years   |  |
| Other            | 5 years     |  |

### Intangible assets

Intangible assets are valued at acquisition cost, less accumulated depreciation and accumulated loss from impairment.

Intangible assets are amortized on a straight-line basis over 3 - 5 years.

### Receivables and other assets

Receivables and other assets are reported at nominal value, where necessary adjusted by specific bad-debt charges.

#### Inventories

Inventories are assessed at lower of the cost or the net realizable value. Expenses attributable to transportation of each inventory to its current location and present condition, are included in the cost of inventories. Inventories are written-off under FIFO method.

## Cash and cash equivalents

Cash and cash equivalents comprise cash at banks and on hand and short-term bank deposits.

For the purpose of the cash flow statement, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

#### Liabilities

Liabilities are reported at the prepayment amount.

### Income recognition

Income from grants is recognized in the period in which expenses related to fulfillment of the grant were incurred.

Financing of capital investments is recognized as income in the period of beneficial usage of corresponding investment facilities (fixed assets, intangible assets, etc.) in proportion to the amount of accrued depreciation of such facilities.

Incurred project expenses coordinated with donors are recognized as receivable at the same time as income is recognized.

Accordingly, deferred grant income comprises income received in advance of the period to which it relates, is excluded from income, and accounted for as a current liability.

Similarly, accrued grant income which is income designated for the current year but received subsequent to the financial year end, is included in income and accounted for a current asset.

#### Interest income

Revenue is recognized as the interest accrued (taking into account the effective yield on the asset).

### Project fund

This fund includes voluntary contributions from organizations and citizens of Ukraine and non-project contributions from non-residents of Ukraine to support Ecoaction activities.

#### Property fund (Equipment fund)

Upon acquisition, through grants, of fixed assets which remain the property of the organization, the funds from grants are transferred to the Property fund. In the future, income from financing is recognized proportional to the amount of accrued depreciation.

## 4. Property, plant and equipment

During the years ended 31 December, depreciated cost of property, plant and equipment changed as follows:

|  | Equipment    | office<br>furniture<br>and<br>fittings | Others | Total               |
|--|--------------|--|--------|---------------------|
| Value as at 01.01.2021   | 31 604       | 7 093                                  | 1 431  | 40 128              |
